

CLEANROOM & SEMICONDUCTOR

Clean down to the last particle.

Socket head cap screws, washers and hex nuts in A4 stainless steel – EPK-treated, cleaned to Gr. 2 or Gr. 4 for ISO class 5-7 cleanrooms and vacuum-packed, ready to install.

EPK = ELECTROPOLISHED + KOLSTERISED

A4 stainless steel (AISI 316)	EPK treated parts in stock	ISO 5-7 cleanroom classes	5-50 pcs per vacuum pack
---	--------------------------------------	-------------------------------------	------------------------------------

FROM PART TO CLEANROOM

01 A4 stainless DIN / ISO parts in AISI 316	02 Electropolishing Smooth, passive surface that holds fewer particles	03 Kolsterising 900-1300 HV surface: no galling, corrosion resistance kept	04 Gr. 2 / Gr. 4 clean Precision cleaned for ISO class 5-7	05 Vacuum-packed Per 5, 10, 25 or 50 pieces
---	--	--	--	---

PRODUCT RANGE

01 Socket head cap screws The core of every cleanroom assembly DIN 912 / ISO 4762 · countersunk DIN 7991	02 Hex nuts Matched to the screw, same treatment DIN 934 / ISO 4032 · ISO 4035 thin nuts
03 Washers Flat and large-diameter washers DIN 125 · DIN 9021 · DIN 433	04 Engineered components Stainless or titanium, with or without vacuum hole Made to your drawing · same cleaning and vacuum packing

SHORT LEAD TIMES

EPK from stock

We keep EPK-treated A4 parts in stock, so Gr. 2 or Gr. 4 cleaning and vacuum packing start as soon as you order – no waiting for electropolishing and Kolsterising.

Quality you can trace

ISO 9001:2015 · cleanliness certificate · lot traceability

Built for

Semiconductor equipment · vacuum technology · space · pharma
